

Aluprof SA offers many types of handles, which have been divided, on visual and price grounds, into three product lines:

- CLASSIC line - with optimal, ergonomic shapes and finish in any RAL color.
- STANDARD line - including basic products, the most affordable
- STYLE line - for the most discerning customers, including products with distinctive shapes, available in the widest range of finishes: both in selected colors, anodized and in INOX version - made of stainless steel.

The offer also includes external recessed handles for HS doors, as well as well-known and respected in the industry selected products from ROTO and FAPIM companies, dedicated to aluminum structures, including, among other things, roseless handles.
