

MB-70 Pivot

The pivot window

This structure is based on the MB-70 window/door system and has a trade name – MB-70 PIVOT.

The presented MB-70 PIVOT window is a part of the MB-70 window/door system with a thermal break. It is intended for production of windows requiring thermal and acoustic insulation with vertical or horizontal rotation axis. These types of windows are intended to be built in the brick structure openings or to be mounted in the mullion-transom façade.
