

MB-78EI

Divisória resistente ao fogo sem costura

Aluprof offers the MB-78EI system-based transparent, fire-rated wall solution, the so-called muntin-free walls. This allows for the construction of internal partitions walls without the visible vertical wall profiles that separate the individual modules of the wall, while preserving their full fire resistance.

MB-78EI Muntin-free system brings you virtually unlimited design and construction possibilities of very large internal partition walling. Thanks to the transparent modules, all the constructions fabricated using this system make your interiors optically bigger. Our system also provides security by allowing the arrangement of the building's fire zones, thus ensuring appropriate conditions for the evacuation of people.
